## Experience

2024 - NOW

### **Back-End Developer / Intersol – Fortaleza, Brazil**

Back-end development on tax solutions using Ruby on Rails. I develop and maintain integrated systems for various municipalities, optimizing municipal tax management. My work involves implementing new features, fixing bugs, and continuous improvements. Additionally, I collaborate with the team to ensure the efficiency and scalability of the applications.

2022 – 2024

### **Software Developer / Hahn Software - Germany**

Development and maintenance of a driver's license registration and management system for the German government. I actively contributed to the design, development and ongoing refinement of innovative solutions for the project. My tasks also include code reviews, testing and writing detailed documentation to ensure quality and usability.

Activities:

- Development of front-end features.
- Implementing new features
- Bug fixing
- Code reviews
- E2e testing
- Documentation
- CI/CD
- Agile workflow (Scrum, Kanban)

2021- 2022

## **Full Stack Software Developer / Freelancer - Remote**

Services:

- Developed projects using modern web technologies and techniques such as HTML5, CSS3 Javascript, PHP and Ruby.
- Responsible for integration of APIs made in Laravel and Ruby on Rails
- Worked on the development of SASS systems, together with another developer, using Next.js.
- Carrying out code reviews to ensure product quality.
- Application of agile methodology in the projects developed.

Major projects:

- Scheduling system for a client in the health sector, which resulted in 30% more appointments for the client.
- Website and student enrollment management system for a local high school, which facilitated and automated the entire student registration process.
- Scheduling system for clients in the barbershop sector, which automated the entire scheduling flow, making my client's life easier and bringing in more bookings.
- Development of a landing page for a local punk rock band called "Intrusivos".
- Development of a virtual menu system that manages orders and integrates with WhatsApp, for a client in the confectionery sector.

---

## **Education**

2022 - 2024

### **Systems Analysis and Development / Uninassau**

I learned to develop and implement software solutions to solve complex problems. I explored programming languages, data structures, algorithms and software development methodologies. In addition, I acquired skills in requirements analysis, system design, testing and software maintenance. The course also covered aspects of project management and teamwork, preparing me to work in various areas of information technology.

---

## **About me**

I started my programming career in 2020 as a freelance developer, developing projects in PHP, HTML, CSS and Javascript. I'm responsible for developing Agenda Fácil, a service scheduling system for companies in any industry. I'm also always looking for new challenges and opportunities to apply my knowledge and develop my skills as a programmer. I'm currently looking for new opportunities to apply my knowledge and add to challenging projects.

---

## Projects

Some complete projects that I have developed and are in production:

**Agenda Fácil:** Scheduling system for companies in various industries.
